| 1 | Base Unit (ISI-2000)
 | + | Power Cable (2m)
 | + | Install Kit #1
 |
| 2 | Smart Antenna (IGT-2100) with 10m cable
 | + | Install Kit #2
 | | |
| 3 | Keypad (KPD-100) with Keypad Cable (2m)
 | + | Install Kit #3
 | | |

Quick Start

1. **Activate your m2500 using mazu app or <https://www.skymate.com/mseries>**
2. **Install the Base Unit (do not connect power until Step 4).**
3. **Install the Keypad.**
4. **Install the Smart Antenna with an unobstructed view of the sky.**
5. **Connect the Base Unit to power (within minutes all indicators should be green).**
6. **Wi-Fi connect your UI device to the Base Unit.**
7. **Launch mazu or login with a browser at mseries.online.**

A Activate your m2500 system

1. Get the system serial number from the retail box (side) or ISI-2000 (bottom)

2.1. Using the mazu app...

- Connect your iPad to the Internet. Download mazu from the Apple App Store.
- Stay connected to the Internet. Launch mazu and follow the instructions to Register and Activate your m2500 system.
- Configure your email app as described in mazu Share. The Incoming and Outgoing Servers are mazu.skymate.com. Your Activation CREDENTIALS (e.g. username, password) are saved in mazu Settings → General.

2.2. Without the mazu app...

- Connect your device to the Internet. Open a browser and go to <https://www.skymate.com/mseries>
- Follow the instructions to Activate.

3. An email is sent to you when you Activate which includes all your mSeries Credentials.

B Install your m2500 system

1. Install the Base Unit (ISI-2000)

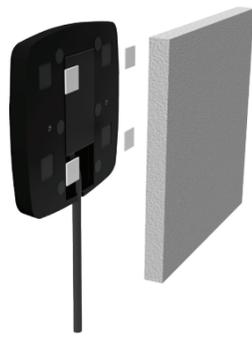

- Select a dry location for the installation.
- Secure the mounting bracket with the double-sided tape (already on the bracket) and/or using the screws provided. Slide the Base Unit onto the bracket until it clicks in place.
- Connect the Power Cable to the boat battery. Connect the black wire to the negative (-) and the red wire to the positive (+). An in-line fuse is not required.

Note: Do not connect the Power Cable to the Base Unit until Step 4.

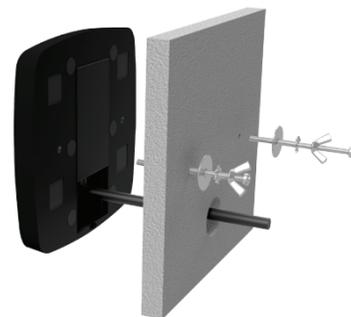

2. Install the Keypad (KPD-100)

- Select a panel location for the Keypad. It can be mounted using the tape on the back of it or be bolted.
- If the Keypad is to be bolted, then drill the holes in the panel using the template provided. Secure it with the supplied wing nuts.
- Connect the Keypad to the Base Unit.

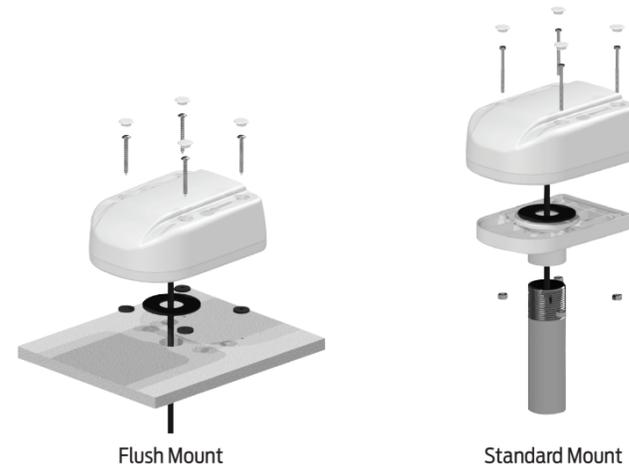

Surface Mount

Through Hole

3. Install the Smart Antenna (IGT-2100)

- Decide whether you want the Smart Antenna to be **flush mounted** or attached to a standard **1-inch-14 mount**. Out-of-the-box, it is configured for the standard mount. The 1-inch-14 mount is not included.
- For the standard mount, **slightly loosen the four bolts** so that the 1-inch-14 adapter can be rotated. **Hand tighten the adapter** to mount, **orient** the antenna; and then **re-tighten the four bolts**.
- For the flush mount, **remove the four bolts, boot and threaded adapter**. **Drill holes** for the four mounting screws and the cable. **Secure it** to the deck with the screws and rubber washers supplied.
- Insert the **four screw caps** provided into the bolt/screw recesses.
- Connect the **Smart Antenna** to the Base Unit. The cable should not be cut. Contact SkyMate for cable extension.

4. Power ON your m2500 system

- Connect the Power Cable to the Base Unit. It will turn ON and self-test. Observe the front panel indicators and Keypad, as this is an indication of proper operation.
 - Within 3-10 minutes, all LED indicators on the Base Unit will be green.
 - On the Keypad, only the SOS buttons will remain ON (dim).
- With all LEDs green, the m2500 system has successfully powered ON and is ready for your mazu iPad to Wi-Fi connect to it to complete your Activation.

Note: The Base Unit LED status descriptions are in mazu Settings > Base System > ISI-2000.

C Test your m2500 system

1. Wi-Fi connect your device or mazu iPad to the Base Unit

- If you have the mazu app, launch it.
- If you don't have mazu, open a browser and enter mseries.online to bring up your mSeries web interface. Enter your **username** and **password** from Activation.

2. Send/Receive email

- Open your email app or mSeries web interface and send a test email to test@skymate.com (this email will be echoed back to you).
- Within a few minutes, the Keypad message waiting light will go ON.
- Confirm that you received the test email response.

3. If you need to change the configuration of your mSeries system...

- Connect to the Internet.
- Go to **mazu Settings** (SKYMATE ACCOUNT) or go the <https://www.skymate.com/mazu> and login.
